World Hijab Day

World Hijab Day is celebrated internationally every year on February 1. This day provides as a special opportunity to highlight diverse communities of learners and create safe spaces for all including those who identify as Muslim and choose to wear the hijab as part of their identity. World Hijab Day also reminds us of the continued work in eliminating barriers, opening conversations, and dismantling stereotypes as a part of our duty bearer responsibilities within the Human Rights Code.

The above are offered as invitations to student inquiry. Be aware in these resources we have not included material in reference to Bill 21, however we acknowledge its impact. Note, MEND discourages against any cultural appropriation on this day.
